Data: last 90 days

WHAT'S INSIDE

- ✓ Your Search Console numbers for the last 90 days, and what the growth curve is telling you.
- ✓ Where you rank best on Google — the restoration win, the remodeling gap, the missing Map Pack.
- ✓ How the AI engines answer for you today — ChatGPT, Perplexity, and Google AI Overviews, live.
- ✓ The near-page-one queries and the review gap that are costing you calls right now.

THE SNAPSHOT

Ninety days of Search Console, in five numbers.

This is Google Search only — organic web results from your Search Console for June 18 to July 26, 2026. It excludes Maps and ads. Two things jump out: impressions are climbing fast, and almost every click so far comes from people searching your name.

JUN 18 → JUL 26, 2026

What the growth curve means

Impressions are up 806% quarter-over-quarter, with a clear liftoff in early July. Google is now testing your pages against far more searches than two months ago — the leading indicator of momentum. Clicks follow once positions climb from page two onto page one.

Brand searches — **already working**

- 17 of your 69 clicks came from just 204 impressions for "TopFlight / Top Flight Builders."
- Average position 1.3, with a 25–30% click-through rate.
- When people know your name, they find and click you instantly. That part is solved.

Non-brand — **the opportunity**

- The other 4,059 impressions (kitchen, bath, remodel, city terms) produced just 1 click.
- Those listings sit on page 2–3 — positions 16 to 31 — where almost no one clicks.
- You're being seen by new customers, not yet chosen by them.

ON GOOGLE

Strong on restoration. Quiet on remodeling. Absent from the map.

Across live searches and your Search Console data, one pattern is clear: you win the specific, high-intent restoration searches, you're buried on the broad remodeling terms, and you're not yet in the local map results at all.

1

Restoration is your win

You're the #1 organic result for "storm & fallen tree damage repair Marietta GA," above Relief Remediation, Capital, and Integrity. Your data agrees — "home restoration near me" sits at position 7.

2

Remodeling is the gap

Kitchen, bath, and whole-home city terms rank on page 2–3 (positions 16–31). Directories like Houzz, Thumbtack, and Yelp, plus established design-build brands, own page one for these searches today.

3

The Map Pack is missing

On both remodeling and restoration searches, Google's local 3-pack shows Integrity, Big House, and AEM. You are not in it. Each carries 250+ Google reviews; you're at roughly 50 — the clearest thing separating you.

Non-brand searches you're already being seen for

SEARCH TERM	IMPRESSIONS (90D)	POSITION
tenant improvement canton ga NEAR TOP	68	3.6
kitchen remodeling marietta	57	18.1
kitchen remodeling marietta ga	54	23.1
kitchen remodeling acworth ga	45	19.5
bathroom remodeling east cobb ga	42	16.6
home restoration near me PAGE 1	39	7.3
home remodeling canton ga	39	19.9

The pattern is unmistakable: your restoration and commercial terms already sit at the top of page one, while the higher-volume remodeling terms are stuck one to two pages back — seen hundreds of times, clicked almost never.

ON THE AI ENGINES

The AI answer engines are split on you.

More buyers now ask ChatGPT, Perplexity, and Google's AI Overview "who should I hire" instead of scrolling links. We asked all three the same Marietta remodeling-and-restoration questions live on July 28, 2026. Here's how each answered.

ChatGPT

RECOMMENDED

Your strongest AI surface. It named TopFlight Builders (5.0) in its top handful of recommended contractors, alongside Alair, GreatHouse, and Green Basements — a genuine recommendation, not a footnote.

Perplexity

CITED, NOT RANKED

It mentions TopFlight, but only as a "newer / boutique option," while its ranked list leads with Integrity, Big House, AEM, and Quality Craftsmen. In the conversation, not near the top of it.

Google AI Overview

NOT CITED

The biggest gap. Even on the fallen-tree query you rank #1 for in classic results, its AI Overview named Capital, Relief, and Integrity — and left you out.

How each surface treats you today

SURFACE	WHAT IT DOES FOR TOPFLIGHT	VERDICT
ChatGPT	Lists you in the top few named contractors for remodeling +	Recommended
Perplexity	Names you as a secondary "boutique" option below the review	Cited
Google AI Overview	Omits you, even where you rank #1 in the classic blue links	Missing
Google organic	#1 for storm / fallen-tree repair; page 2–3 for remodeling terms	Mixed

Why the gap — and why it's fixable

AI engines lean on the same signals as the Map Pack: third-party review counts, directory presence (Houzz, Yelp, BBB), and consistent mentions across the web. Your dedicated /ai-info page is a smart head start most competitors lack. The missing ingredient is the same one holding back your map ranking — volume and consistency of outside signals, reviews most of all.

THE OPPORTUNITY

Turning impressions into calls.

You already have more than twenty non-brand terms parked at positions 8–20 — the doorstep of page one. These are the fastest wins: small pushes here convert directly into clicks, because the demand is already landing on your listings.

Striking distance — near-page-one terms to chase first

SEARCH TERM	IMPRESSIONS (90D)	POSITION
kitchen remodeling marietta	57	18.1
kitchen remodeling acworth ga	45	19.5
bathroom remodeling east cobb ga	42	16.6
home remodeling canton ga	39	19.9
home remodeling company acworth ga	26	11.3
remodeling acworth ga	25	12.4

NEXT STEPS

Four moves, in priority order.

Each one compounds: reviews lift both your map ranking and your AI citations, restoration content feeds the searches you already win, and the remodeling pages are a short climb from page one.

01

Build a reviews engine

Close the 250-vs-50 review gap with an ask-after-every-job step. Your single biggest lever.

02

Own restoration

Double down where you win: city storm, tree, and water-damage pages.

03

Rescue remodeling pages

Push the kitchen, bath, and city pages from position 16–23 onto page one.

04

Feed the AI engines

Grow /ai-info, keep NAP consistent across Houzz, Yelp, and BBB, add schema.
